

Arun J

Full Stack Node.js Developer

arunrock14331@gmail.com | +91 9941799823 | Chennai, India | LinkedIn | Github | Portfolio

PROFESSIONAL SUMMARY

Full Stack Node.js Developer with 4.5+ years of experience building scalable enterprise web applications and RESTful APIs. Proven expertise in Node.js, Express.js, Angular, and microservices architecture with strong proficiency in both SQL and NoSQL databases. Hands-on experience with AWS cloud services (Lambda, S3, SQS, SNS, MSK/Kafka) and Microsoft Azure. Specialized in healthcare domain applications with a strong record of improving system performance, reducing operational overhead, and delivering production-ready features in agile teams.

TECHNICAL SKILLS

Backend: Node.js, Express.js, RESTful APIs, Microservices, C#, ASP.NET Core, Entity Framework, LINQ

Frontend: Angular, TypeScript, JavaScript (ES6+), HTML5, CSS3, Bootstrap, Responsive Web Design

Databases: Microsoft SQL Server, MongoDB, Mongoose, SQL Query Optimization

Cloud & AWS: AWS Lambda, Amazon S3, Amazon SQS, Amazon SNS, AWS MSK (Kafka), AWS Glue, Microsoft Azure, Azure App Services

DevOps & Tools: Git, Visual Studio, VS Code, Postman, npm, Unit Testing

Methodologies: Agile, Scrum, Code Review, Production Support

WORK EXPERIENCE

Associate

January 2024 – Present

Cognizant Technology Solutions

- Developed full stack applications for Wellmark Health Insurance using Node.js, Express.js, .NET Core, Angular, and SQL Server, supporting 10+ enterprise healthcare workflows.
- Architected and delivered Provider Portal features integrating AWS Lambda APIs, Amazon S3, SQS, and SNS for event-driven healthcare data processing.
- Implemented DataPub pipeline: AWS MSK (Kafka) ingests JSON events, triggers Lambda for deserialization via AWS Glue, and stores records in S3 for downstream vendor consumption.
- Designed RESTful microservices using Node.js and Express.js, achieving 25% improvement in API response times and enabling scalable healthcare integrations.
- Conducted code reviews and production support, reducing post-release defects by 20% and improving overall application stability.

Programmer Analyst

August 2022 – December 2023

Cognizant Technology Solutions

- Engineered healthcare management solutions for Premiera Blue Cross using Node.js, Express.js, Angular, and MongoDB, serving thousands of end users.
- Contributed full stack features for Wellmark Health Insurance using Node.js, .NET, Angular, and SQL Server, streamlining insurance workflows.
- Optimized SQL queries and backend logic, achieving 30% faster data retrieval and reducing manual processing efforts by 15%.

Programmer Analyst Trainee

January 2022 – July 2022

Cognizant Technology Solutions

- Completed full stack development training covering Node.js, Express.js, MongoDB, Angular, ASP.NET Core, and Microsoft SQL Server.
- Created 3+ enterprise-grade applications simulating healthcare and business use cases, achieving 100% training milestone completion.

PROJECTS

DataPub — AWS Event-Driven Data Pipeline

- Architected an enterprise data distribution pipeline processing event streams across 5+ upstream producer systems for Wellmark Health Insurance.
- Configured AWS MSK (Kafka) to ingest 1000+ JSON payloads per batch with fault-tolerant partition management.
- Triggered AWS Lambda functions to deserialize incoming messages using the AWS Glue schema registry for structured data validation.
- **Tech Stack:** Node.js, AWS Lambda, AWS MSK (Kafka), AWS Glue, Amazon S3, Amazon SQS, Amazon SNS

SQL Query Automation Tool

- Automated execution of 20+ predefined SQL queries, eliminating repetitive manual database operations.
- Generated Excel reports from query results and distributed them via Nodemailer/Outlook integration, cutting report delivery time by 60%.
- Implemented daily and weekly scheduling for recurring report runs across 10+ stakeholders, improving reporting accuracy and eliminating manual errors.
- **Tech Stack:** Node.js, Nodemailer, Microsoft SQL Server

Portfolio & Portfolio Generator — Vibe Coding Challenge (GitHub Copilot Agent)

- Launched a personal portfolio website using Angular, showcasing 5+ projects and achieving a responsive UI across all device sizes.
- Shipped a full stack portfolio generator with 3+ templates, enabling developers to publish personalized portfolio sites in under 5 minutes.
- Cut development time by 40% using GitHub Copilot agent (vibe coding challenge), demonstrating practical AI-assisted full stack development.
- **Tech Stack:** Node.js, Express.js, Angular, MongoDB, Mongoose, GitHub Copilot Agent

CERTIFICATIONS

Microsoft Azure Fundamentals (AZ-900) — 2024

Foundational knowledge of cloud services and Microsoft Azure architecture.

EDUCATION

Velammal Engineering College

2016 – 2020

B.Tech — Information Technology

LANGUAGES

English — Professional | Tamil — Native
